- Easy installation
- 5-Year warranty
- Accessible helpdesk
- Multilingual user manual

Sharing your documents and media has never been so fast before! Simply slide a 3.5” SATA harddisk into the Eminent EM4071 and create a high speed NAS system. The Giga-Share NAS offers you true power at gigabit speeds. Thanks to its 1000Mbit network interface, it can serve as the centerpiece of your home network. The GigaShare NAS does not only share files, it also acts as a UPnP mediaserver and downloads files using Torrents (Transmission) or Newsgroups (NZBget). The built-in printer server enables you to share your USB-printer on the network.

You can mount up to 1.5TB of space using the easy slide-in bay, and if the internal capacity is not enough, you can always add an external storage solution to the USB port.

The GigaShare NAS is provided with free (GPL) modules, including NZBget, Bittorrent, Mediaserver and MLDonkey. You can turn off your computer and let the Gigashare NAS do all the downloading. All the modules are optional, so you can choose not to install them if they are not needed.

The Eminent EM4071 Gigashare NAS is the perfect solution for home users that demand optimal performance from a NAS.
